

SmartPropoPlus Version 3.3.9

Release Notes

This version included many changes under the hood while keeping the external look unchanged.

Among the changes:

- Windows 7/ Vista support: No need to run in compatibility mode.
- Better PPM response: Support for higher sample rates, up to 96KHz.
- Full support for multi sound card computers.
- Installer: Prevents installation of SmartPropoPlus if FMS or PPJoy are not installed.
- Installer: Offers cleaning of all SmartPropoPlus related registry entries.

Limitations:

- MS Windows only.
- Windows XP or higher.
- Vista: SP1 required.
